

FICTIONAL DEMONSTRATION — PLACEHOLDER DOCUMENT.

## This is where the full original lives

In a real case file built with the **lemon-case-file** method, this link serves the full-resolution original of the document you clicked: the repair order, technical bulletin, recall filing, transcript, or written position — hosted on the owner's password-gated evidence site, one click from the claim it supports, labeled with its exhibit number.

Every document in the demo points here because the demo is fictional and contains no real records. See **prompts/06-evidence-site.md** and **site/DEPLOY.md** in the repository to build the real thing.
